

The logo for Allegro, consisting of the word "allegro" in a lowercase, white, sans-serif font. The background of the slide features a large, semi-transparent orange circle on the left side, and a blurred photograph of a person's hands typing on a laptop keyboard on the right side. The person is wearing a light blue sweater. In the background, there are several cardboard boxes, suggesting a warehouse or shipping area.

allegro

Allegro: 3P marketplace with 1P user experience

ILLUSTRATIVE

What are 3P marketplaces?

Business model driven by commission (e.g. take rate) and additional services (e.g. ads)

- ⊕ Asset light business model (e.g. stock owned by 3rd Party merchants)
- ⊕ Technical capabilities to ensure the best user-experience
- ⊕ Competition of 3rd Party merchants for lowest prices with positive influence on marketplace revenues
- ⊖ Reliability on 3rd Party merchants sales quality (e.g. limited control over dispatch time, quality of items)

Example: Etsy, MercadoLibre, AliExpress, eBay, Zalando Partner

What are 1P e-commerce players?

Business model driven by positive sales margin

- ⊕ Full ownership of customer experience (e.g. fast dispatch from own warehouses)
- ⊖ Technical capabilities and operational excellence (higher overhead & CAPEX)
- ⊖ Heavy cost base (e.g. OPEX: stock, CAPEX: warehouses) and a risk of negative margin (e.g. low sales prices)

Example: Walmart, Kingfisher, Mytheresa, BestBuy

allegro combines the best elements of both worlds

While we benefit from profitable 3P marketplace asset light model we, as 1P players, take full ownership of shopping experience which is proven by world-class 70+ NPS
